Almost every person knows his or her Sun sign. This is the sign that the Sun was in when you were born, what you reply with when someone asks, “What’s your sign?”

Fewer people know their Moon sign, and this is a shame because a person’s Moon sign can be extremely important and having a little bit of knowledge about your Moon sign can be extremely helpful in self understanding. If you have even an approximate time of birth, it is almost always possible to know your Moon sign.

Yyou can think of your Sun sign as who you are or how you express your personality to the outside world and your Moon sign represents your inner world - your feelings and emotions-your sense of security.

For instance, I am a Libra with a Cancer Moon. As a Libra, I am fun loving and very social. As a person with a Cancer Moon, I need quite time and privacy. Often times there is an inner conflict with my need to be out and interacting with others and my intense need for alone moments. I have had to learn to remember to take time off for my self.

Let’s look at a few examples. John Lennon was a Libra with an Aquarian Moon. As a Libra, he was artistic and harmonious. However, with that Aquarian Moon, he needed unconventionality. If we just know that Lennon was a Libra, we miss much in understanding him. Lennon was a man of peace and of art, but he had to achieve art and strive for peace through non-traditional means. Yoko Ono is a Pisces with an Aries Moon. As a Pisces, she is imaginative. With an Aries Moon, she needs to be number one. As a very imaginative person, she would be attractive to the artistic Lennon. Her need to be number one is perhaps the reason why so many people have not liked her or sympathized with her. Paul McCartney is a Gemini with a Leo Moon. As a Gemini, he is versatile. With a Leo Moon, he needs drama. McCartney has sometimes been accused of being shallow musically; as a Gemini, this is always a tendency that he will have to guard against. However, his Leo Moon encourages him to seek center stage and to grow so that he may continue to find an audience.

Oprah Winfrey is an Aquarius with a Sagittarian Moon. As an Aquarian, she is unconventional. With her Sagittarian Moon, she needs to teach and preach. Oprah’s popularization of New Age spirituality seems almost inevitable, given this small bit of information about her.

Charles, Prince of Wales, is a Scorpio with a Taurus Moon. As a Scorpio, he is intense. With a Taurus Moon, he needs stability. Princess Diana was a Cancer with Moon in Aquarius. She was deeply emotional; she needed unconventionality. Can we see how this simple knowledge helps us to understand why this marriage did not succeed? Prince Charles’ need for stability and simplicity was at odds with Princess Diana’s need for unconventionality and rebelliousness.

Often, a person will seem more like his or her Moon sign than his or her Sun sign, at least in certain situations. Often, our Moon sign shows where we are most vulnerable. It can also show our dreams and desires and ideals. In fact, if you want to know where someone’s heart is, know his or her Moon sign. The Moon sign, taken in combination with the Sun sign, will tell you a great deal about a person and is an essential part of learning about yourself.
